

POSTDOCTORAL SCIENTIST – Microalgae

Shannon Applied Biotechnology Centre (Shannon ABC) is a research centre that is a collaboration between the Institute of Technology, Tralee and Limerick Institute of Technology and is funded as a Technology Gateway by Enterprise Ireland. Shannon ABC at Limerick Institute of Technology have significant expertise in Microalgae.

The project proposed will be based on the evaluation of the potential of existing and newly developed intellectual property relating to Microalgal Biotechnology for commercialisation. This Career-FIT Plus project will address this, in collaboration with other third level colleges, as well as an industry partner where scale up will occur.

Career-FIT PLUS aims to enhance the training and mobility of Experienced Researchers (ERs) through the undertaking of individually-driven, industry-focused research training projects which will be interdisciplinary and focused on the domain areas of the eligible Technology Centres and Technology Gateways in Ireland.

Shannon ABC invites suitably qualified applicants who wish to pursue a joint application for a Career-FIT Plus award to contact us to discuss the program.

The aims of the fellowships are to support suitable highly qualified experienced researchers in the microalgal biotechnology discipline area to:

- Conduct research relevant to the Technology Centres/Technology Gateways;
- Engage in collaboration with suitable companies;
- Experience and benefit from international mobility;
- Avail of relevant training and career development opportunities;
- Increase their chances of gaining a future senior research position, including in the non-academic sector.

Qualifications, Eligibility and Salary criteria are available at this link:
